

Dear Commissioners,
Please delay your vote scheduled for June 2 on relaxing restrictions on media ownership in a market. I believe strongly that this is an issue of huge importance which deserves more public debate and information. This decision of yours has enormous ramifications. "Act in haste, repent at leisure." Even those of you who support relaxing the regulations may not see the full picture of effects which you will set in motion should you vote on June 2 to do just that. Please take more time, represent the citizens of this country in *regulating* the communications industry, insuring diversity of voices. The citizens of this country don't need you to represent the communications industry and look out for their profit line. We need you to look out for the public interest. I urge you to delay the vote scheduled for June 2.
